

CareGuard® Bite Blocks

CareGuard®

The bold choice for upper GI procedures.

Why compromise sensitive, expensive equipment when a simple solution from Medovations can change everything? Our line of bite blocks takes a colorful twist on caring for your endoscopes and your patients.

At a glance you'll know it's different

CareGuard® Bite Blocks are available in three fresh colors and two sizes. Select from 48 FR and 60 FR sizes, as well as a 60 FR XL model that features more substantial lip guards. The 60 FR and 60 FR XL models easily accommodate a 60 FR Medovations Esophageal Bougie or Wire-Guided Dilator. Trust the construction of CareGuard Bite Blocks to provide the protection you need.

Durable, dependable design

Created with the patient and the caregiver in mind, CareGuard Bite Blocks ensure comfort and convenience. Integrated dental retention rims maintain the position of the bite block during procedures, while lateral ports on the 60 FR and 60 FR XL bite blocks allow for easy positioning of additional suctioning equipment. For a comfortable, secure fit choose optional blue or soft straps that adjust to the needs of any patient.

Disposable and color-coded

Individually wrapped CareGuard Bite Blocks are made for one-time use, reducing the risk of cross contamination. Color coding makes it easy to reach for the right size every time.

Adjustable blue strap

Adjustable soft strap

You know Medovations for innovative, reliable and cost-effective solutions.

Now, there are even more reasons to smile.
